

Yug Patel

+1(814)-475-9924 | yugr2005@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

I've spent 3+ years in computer science building full-stack applications, with a focus on scalable backend systems and data-driven features. Experience includes developing production-grade MERN applications, processing and analyzing user data, and integrating AI-driven insights using structured datasets.

EDUCATION

Rutgers University

Bachelor of Science in Computer Science, Minor - Data Science

GPA: 4.0/4.0 | Coursework: Data Management for Data Science, Database Management, Statistics, Systems Programming in C

New Brunswick, NJ

Sept 2025 - Present

Middlesex College

Associate of Science in Computer Science

GPA: 4.0/4.0 | Recipient, Frank M. Chambers Award for Academic Excellence

Coursework: Data Structures & Algorithms, Object-Oriented Programming, Computer Architecture & Organization

Edison, NJ

Jan 2024 - May 2025

PROJECTS

UniSave – AI-Powered Financial Platform | *ReactJS, NodeJS, MongoDB, OpenAI API*

[Link](#)

- Built a production-grade application enabling users to track expenses, analyze spending patterns, and generate AI-driven financial insights from user data across multiple categories and time ranges.
- Designed context-aware AI workflows using OpenAI APIs, dynamically aggregating and structuring user expense data to answer open-ended financial questions before LLM inference.
- Optimized the user interface, achieving a 20% reduction in bounce rate through targeted UX/UI improvements, improving the overall user experience.

Website Crawler | *Python, Streamlit, BeautifulSoup, XML, HTML Parsing*

- Developed a dual-mode website crawler (sitemap/manual) with real-time progress tracking, semantic content extraction, and domain-specific filtering.
- Benchmarked against Firecrawl, achieving ~5% faster extraction times on medium-sized websites by optimizing request handling and retry logic.
- Adaptive crawling logic with fallback handling and dynamic progress scaling for robustness across varied site structures.

Food Delivery E-commerce Website | *ReactJS, NodeJS, MongoDB, Stripe- Payment, Tailwind-CSS*

- Designed and deployed a responsive platform with a scalable user experience for ordering food and restaurant management.
- Implemented JWT-based authentication with role-based access control to secure data management and distinct functionalities for users, restaurants, and admins.
- Integrated a secure payment gateway via Stripe API during checkout, allowing users to view their order history.

EXPERIENCE

Teaching Assistant

Middlesex College

Edison, NJ

Jan 2025 - May 2025

- Assisted 45 students in understanding programming concepts for Object-Oriented Programming in Java.
- Guided 30 peers in Git/GitHub workflows, leading to a 100% success rate on the GitHub Foundations certification.
- Supported lectures, labs, and office hours by helping diverse groups of students debug code, troubleshoot issues, and reinforce best coding practices.
- Reviewed and graded 200+ assignments with a focus on accuracy, code quality, and adherence to requirements.

SKILLS

- **Programming Languages:** Java, Python, JavaScript, HTML, CSS
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Frameworks:** ReactJS, NodeJS, Express, Tailwind-CSS
- **Technologies:** Git, GitHub, AWS, REST APIs, Vercel, Cloudflare
- **Certifications:** GitHub Foundations Certification by GitHub
