EDUCATION

Rutgers University

Bachelor of Science in Computer Science

GPA: 4.0 | Coursework: System Programming in C (Linux/Unix, memory management), SQL

New Brunswick, NJ

Sept 2025 - Present

Middlesex College

Associate of Science in Computer Science

GPA: 4.0 | Recipient, Frank M. Chambers Award for Academic Excellence

Coursework: Object-Oriented Programming, Data Structures & Algorithms, Computer Architecture & Organization

Edison, NJ

Jan 2024 - May 2025

PROJECTS

UniSave – AI-Powered Financial Platform | *ReactJS, NodeJS, MongoDB, OpenAI API*

[Link](#)

- Built a production-grade application enabling users to track expenses, analyze spending patterns, and generate AI-driven financial insights from user data across multiple categories and time ranges.
- Designed and tested context-aware AI workflows using OpenAI APIs, dynamically aggregating and structuring user expense data to answer open-ended financial questions.
- Architected a scalable SaaS roadmap including weekly/monthly budgeting alerts, real-time offers/discounts recommendations, and Stripe-based premium monetization.

Website Crawler | *Python, Streamlit, BeautifulSoup, XML, HTML Parsing*

[GitHub](#)

- Developed an automated and dual-mode website crawler (sitemap/manual) with real-time progress tracking, semantic content extraction, and domain-specific filtering.
- Benchmarked against Firecrawl, achieving ~5% faster extraction times on medium-sized websites by optimizing request handling and retry logic.
- Adaptive crawling logic with fallback handling and dynamic progress scaling for robustness across varied site structures.

Food Delivery E-commerce Website | *ReactJS, NodeJS, MongoDB, Stripe- Payment, Tailwind-CSS*

[Github](#)

- Designed and deployed a dynamic platform with a scalable user experience for ordering food and restaurant management.
- Tested JWT-based authentication with role-based access control to secure data management and distinct functionalities for users, restaurants, and admins.
- Integrated a secure payment gateway via Stripe API during checkout, allowing users to view their order history.

EXPERIENCE

Teaching Assistant

Middlesex College

Edison, NJ

Jan 2025 - May 2025

- Assisted 45 students in understanding programming concepts for Object-Oriented Programming in Java.
- Supported lectures, labs, and office hours by helping diverse groups of students debug code, troubleshoot issues, and reinforce best coding practices.
- Reviewed and graded assignments with a focus on accuracy, code quality, and adherence to requirements.
- Collaborated with faculty to ensure consistent instructional and evaluation standards.
- Guided 30 peers in Git/GitHub workflows, leading to a 100% success rate on the GitHub Foundations certification.

SKILLS

- **Programming Languages:** Java, Python, C, JavaScript, MySQL
- **Frameworks:** ReactJS, NodeJS, Express
- **Technologies:** Git, GitHub, AWS, Docker, REST APIs
- **Certifications:** GitHub Foundations Certification by GitHub
- **Testing & Automation:** Test case execution, debugging, validation logic, automated workflows
